

The Klein Patented Trapezoid Design low-center-of-gravity KF Diesel tank along with the Patented Sage Oil Vac Lube system is the next-generation truck mounted Lube body in the World market today. This complete On-Road lubrication package delivers clean products through a patented oil exchange pumping system that will also remove waste oils and is capable of reducing servicing time down to 1.5 to 2.5 hours per oil exchange. The Sage Oil Vac process is 66% faster than gravity drain, resulting in quick paybacks in workforce time savings and labor. Our units use a "3 to 10 Micron Pre-Filtration System" ensuring that the products are cleaned to meet the industries high ISO oil cleanliness standards. Our Lube Bodies are designed with the end-user in mind and offer a simplistic, easy to operate, efficient, time-saving, environmentally friendly machine for all industries in any part of the World. Contact us at sales@dega.com or please visit www.sageoilvac.com/lubetrucks to view our Lube DVD Video.

Traditional Oil Change Method 	Patented Sage Oil Vac Method 
Costly Pump Repairs	No Pumps
Gravity Drain	Vacuum Fill to drain tanks in half the time
Exposed Fluid Transfer	Enclosed Clean System provides:
Spillage	- Safety for employees
Oil Buckets	- Better for Environment
Very Dirty Transaction	- More efficient / low cost / easier to use
