

THE EXPERTS IN HEAVY HAUL SOLUTIONS

Premium Quality and Performance

- 4-beam, T-1 high-strength steel design
- Targeted material placement
- All welds applied horizontally stable arc positioning

Ensures highest strength-to-weight ratios and long life

KS Heavy-Duty Neck

- 5-position hydraulic detachable neck
- Self-locking
- Controls independent from deck for safety

Provides the utmost in safety, ease-of-use and speed of operation

Enhanced Safety Features

- Integrated pressure relief valve
- Lower center of gravity
- Increased load stability
- Special D-Rings for secured payload

Greater confidence in loading, unloading and transport

World-Class Paint System

- Standard blast spec is higher than others' maximum
- Computer- and climate-controlled HVLP paint system
- Epoxy primer and polyurethane products

Longer-lasting, more durable, more appealing surface finish

Proven and Protected—Best Warranty!

- 5-year warranty
- Quality-controlled assembly line manufacture
- ISO 9001:2015 quality certified
- Backed by 50+ years of heavy-haul expertise

A premium trailer you can rely on to perform

ENGINEERED TO PERFORM. **BUILT TO LAST.**

KALYN SIEBERT—THE PREMIUM CHOICE IN CUSTOM HEAVY-HAUL

Why Choose Kalyn Siebert?

Proven Transport Expertise—We are experts in custom-engineered and manufactured, specialized heavy-haul solutions, proven by our:

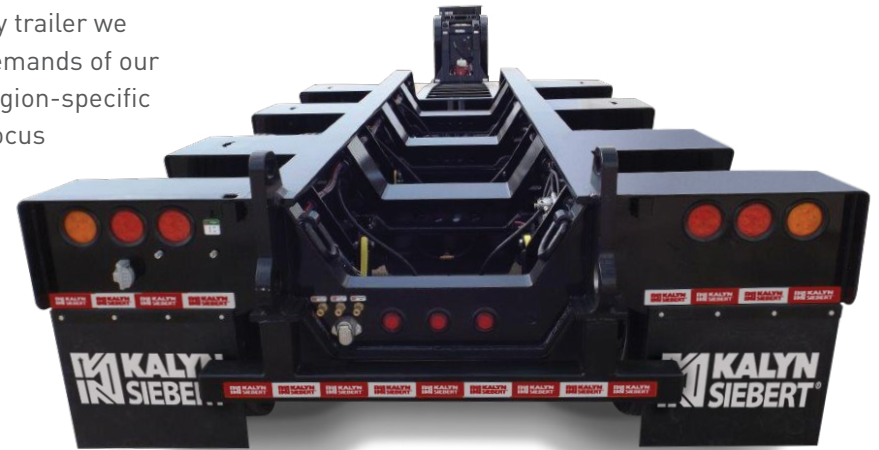

- 50-year reputation for durability in specialized transport
- 15+ years average employee experience
- Quality-controlled assembly line manufacturing
- Proprietary tooling, processes and innovations
- All welders AWS-certified
- Military-spec build capabilities
- Surface prep and finishing higher than industry standard
- Load- and region-specific engineering
- Range of successful specialized projects
- ISO 9001:2015 quality certified

This expertise enables us to create trailers and equipment that perform when the pressure is on, meeting and exceeding our customers' biggest transport challenges.

Custom-Manufactured—Every trailer we build is uniquely suited to the demands of our customers and their load and region-specific requirements, worldwide. Our focus on the specialized needs of our customers enables us to deliver custom solutions that are engineered to perform, built to last.

Premium Build Standards—Our build minimums exceed industry standards and are your assurance of Kalyn Siebert quality and durability throughout. This includes custom engineering, military-grade surface prep and finish, targeted material placement and more. This is why every KS product is backed by one of the best warranties in the industry.

Premium Finish Durability—Manufacturing our products in the dry Texas climate provides a geographic advantage, greatly mitigating surface corrosion on bare metal. Along with our military-spec minimum blast grade, it provides for superior finish adhesion, durability and long life.

Tested Texas Tough—The Kalyn Siebert off-road test facility used to meet military-spec requirements also benefits our non-military customers. All our trailer units are validated on the same demanding off-road test track to ensure they meet your specific requirements and provide the utmost in reliability and durability, no matter where they go into service.

ENGINEERED TO PERFORM. BUILT TO LAST.
