

KLEIN KSFL LUBE/FUEL ON ROAD TRUCK

SAFER.

Enclosed clean system reduces chance of spills, protecting employees and the environment. The Patented Trapezoid Diesel Klein Tank design is the safest and most stable tank system available.

VERSATILE.

LubeBuilder™ Series lets you modify existing lube systems with new tanks and components.

ECONOMICAL.

No pumps means fewer maintenance issues and a lower cost of ownership.

FASTER.

Vacuum fill product tanks up to 10 to 15 gallons per minute. Much faster than filling from bulk tanks or pumping from drums.

CLEANER.

Fresh oil filters guarantee clean oil is loaded onto the equipment. The Vacuum system keeps oil off the ground with fewer spills.

Uses compressed air to build vacuum in used oil tank and new oil tanks

Use filter stinger to puncture and vacuum oil from filters

Vacuum in fresh oils and fluids at a rate of 10 - 15 gallons per minute

Put oil filters in used filter receptacle to allow filters to drain.

Fill equipment with new fluids without using a pump

Connect to equipment and vacuum used oil without using a pump
