MANUFACTURERS OF SUPERIOR LIQUID DISTRIBUTING EQUIPMENT

ON/OFF HIGHWAY TRUCK TANKS

Klein Products designs and manufactures superior quality liquid distributing tanks and all the related accessories for all brands of on/off highway trucks including International, Freightliner, Mack, Kenworth, Peterbilt, Western Star, Ford and others. Klein tanks are available in every size category. A large selection of pumps, valves, spray equipment and other accessories are available to build up the perfect water truck for your application.

OFF HIGHWAY TRUCK TANKS: ARTICULATED FRAME

The articulated frame off highway truck is now a highly desired water truck. Klein has the experience and proven track record to design and manufacture the perfect tank system for your articulated truck. Our articulated truck tank systems are low profile in design with an emphasis on a low center of gravity. Our designs are safe, durable and functional. Our tank systems can be outfitted with pumps and discharge equipment for your specific application.

OFF HIGHWAY TRUCK TANKS: RIGID FRAME

Klein Products is the pioneer and world leader in the design and manufacturing of large capacity off highway truck tank systems. For nearly 60 years Klein has supplied the mining and construction industries with superior quality, productive liquid distributing machinery. Klein has designed and manufactured tank systems for every brand of off highway truck. Our Off Highway truck tanks are in use today in every state in the USA and in many foreign countries.

TRACTOR SCRAPER CONVERSION TANKERS

Klein Products converts tractor scrapers to tractor pulled water tankers. Available for all brands of scrapers in any size category. We can completely install the tanker to your tractor scraper or we can ship you a tanker kit. Our tankers have long been recognized throughout the world as the superior product in its class.

 **Klein** designs, manufactures, and delivers superior quality liquid distributing machinery. Our products are innovative, yet simple in design, precisely manufactured, reliable and productive on the job. With nearly 60 years of continuous service to companies like yours,  **Klein** has earned its worldwide reputation as the most successful company of its kind in the world!

THE KLEIN PORTO-TOWER MODEL KPT

The Porto-Tower is a large capacity, portable water tower system. Designed to recover water trucks and water wagons quickly, safely and economically. The Porto-Tower is highway legal, completely self contained and can be erected into operating position by one person in less than 30 minutes. The Porto-Tower is the original portable water tower system. We invented it over 40 years ago.

THE KLEIN STAND TOWER MODEL KST

The Klein Stand Tower is a large capacity, stationary water storage tank mounted in a structurally engineered steel stand. The KST is designed to recover water trucks and water wagons quickly, safely and economically. Available in capacities to 20,000 U.S. gallons.

THE KLEIN HURRICANE BRAVO MODEL 12 XD

The Hurricane Bravo is a high volume, portable, water pump system. Completely self contained, the Hurricane Bravo can be set up into operating position by one person in about 30 minutes. The Hurricane Bravo dramatically improves the productivity of water distributing equipment by recovering their water supply quickly, safely and economically. 4000-5000 U.S. GPM capacity.

TANK AND TANKER KITS

All our tanks and tankers are available in kits that enable you to utilize your own labor to install on your prime mover chassis. Tank kits eliminate the expensive transportation costs involved with moving large prime mover chassis. We have competitive freight rates to ship kits anywhere in the United States. We also have extensive experience in exporting all of the equipment we manufacture.

Klein

KLEIN TRAP TANK

The TRAP tank. This revolutionary tank design from Klein Products **IMPROVES** the safety of operating water equipment by enhancing stability, lowering center of gravity and dramatically improving visibility around the vehicle. Choose the Klein TRAP tank to maximize operator and job site safety. Available in kit form for customer installation or completely installed by Klein on your chassis or ours. Call your Klein sales professional today to place your order.

SPECIAL PURPOSE TANK EQUIPMENT

Klein Products designs and manufactures special purpose equipment for a variety of unique applications. Fire fighting vehicles, fuel and lube vehicles, semitrailer tankers, high pressure washers, tanker trailers, portable water systems and custom storage tank systems are just a few examples of the special equipment that we have successfully completed.

PARTS, COMPONENTS AND ACCESSORIES

Klein Products designs and manufactures parts, components and accessories specifically for the severe conditions of heavy construction and mining. We make superior quality water pumps, water control valves, spray heads, turret monitors, discharge nozzles, hose reels, control stations and many other related items. Complete piping kits and replacement parts for competitive equipment is also available.
